

Flexolite

Flexolite oil filter adaptors enable older oil filter systems to use modern spin-on oil filters and are available for wide range of classic cars.

All Flexolite oil filter adaptors are easy to fit and make changing the oil filter a clean and simple operation. The adaptors do not affect oil pressure switches, warning lights, or pressure-relief valves. In many case they will provide improved start-up oil pressure due to the use of anti-drain valves in modern spin-on oil filters and all cars will benefit from the improved filtration found with modern filters.

Fitting a Flexolite oil filter adaptor also makes it easy to fit an oil cooler to your classic – vital for competition cars as well as older cars which keep pace with modern motoring conditions. Controlling the temperature of your engine oil will add to the life of your engine.

All Flexolite oil filter adaptors use standard, readily-available spin-on filters which can be found at most car accessory shops. Adaptor kits come complete with fitting instructions, any gaskets or seals required and one spin-on filter*. If your car is not listed please contact us for more information as we are constantly adding to our range. We are happy to make adaptors to order or in small batches for owners' clubs etc.

Many British cars of the 1950s and '60s shared engines so if your particular model is not listed please look at other marques which used the same engine. If you are not sure about any particular application or do not see your model listed please ask for availability – we are always increasing our range.

For the many vehicles that have by-pass filters we are able to supply a conversion kit using a remote filter head that takes a modern spin-on filter. Contact us for details.

Prices do not include UK VAT @ current rates. Carriage extra.

*We do not normally include the filter for overseas orders.
